2-11	HARD FABRIC LINE
12-27	HYBRID LINE
28-29	 X  BASS BRIGADE
30-37	DROPTICH LINE
38-45	ACCESSOIRES
46-51	PLUG N GO
52-53	SPARE PARTS

*Freshwater or saltwater?
The pond a bit of a hike from the road?
A quick fishing trip vs. an all day outing?
On the water and concerned about boats?*

Avid fishermen ourselves, we have taken a lot into account when designing our float tubes.

Heko 130

The "HEKO 130" is an ideal float tube that suits the majority of body types. Lightweight at 4.5kg/8lbs, its "V-shape" is formed by two independent vinyl air chambers arranged within a 600D Cordura shell and inflated via safety valves. The "V-shape" reduces waterline drag and improves maneuverability. Equipped with an inflatable seat, two straps permit anglers to adjust the backrest angle. Separate inflation of seat and air chambers ensure maximum safety. Several D-rings can be used to anchor accessories. Use the two side bags or rear seat space to store small tackle boxes and other gear. Includes a scaled apron in cm.

- Available in camouflage : blue, desert, or white
- Maximum weight capacity :136kg/300lbs

One Renegade

 Renegade Series

Seven Bass Design's the "One RENEGADE" is available in desert camouflage and weighs just 4.5kg/8lbs. This kick boat model is equipped with all the essentials for anglers new to the sport of float tube fishing. Two vinyl air chambers and seat inserts are quick to install. The seat and air chambers are inflated separately to ensure maximum safety. Once inflated, novices to kick boating will be riding high on the water and feeling comfortably secure. Equipment and tackle can be stored in the large attached side bags, the open space behind the seat, or in our unique pocket apron.

- Backpack straps are included for convenient transport when inflated

- Available in camouflage : desert
- Maximum weight capacity :136kg/300lbs.

Heko 145

The SEVEN BASS "HEKO 145" V-shaped body is a bit longer than the "One" and "Bolt". Model design feature is defined by a mixed material construction. Minimized structure weight thanks to the upper body 600D Cordura, and improved puncture resistance due to the lower body water contact area made of 1000D PVC. The foam seat is positioned comfortably above the water level. Two adjustable straps modify the inclination of the backrest to adapt to all morphologies. The "V" consist of independent air chambers equipped with safety valves, and inflated individually for maximum safety. Rear seat storage or two generous zippered pockets allow easy storage of your fishing boxes and all the necessary equipment. Several rings allow you to attach various accessories. Includes a graduated stripping apron and backpack straps.

- Available in camouflage : blue, desert, or white.

SIDE

The Seven Bass Float Tube "POONTON" outer shell is made of 600D cordura. The tubular skeleton is made of aluminum to prevent corrosion issues and minimize structural weight for improved portability. The lightweight frame and stout structure means "Poontoon" is one of the most compact models on the market. The foam seat has anglers positioned completely out of the water. Removable cargo bags are attached with Velcro for efficient access. The frame extends behind the seat area for anglers wanting to place a battery and mount an electric trolling motor.

Available in camouflage orange or sand. Oars sold separately.

 *Renegade Series*

Hard Fabric Line

The SEVEN BASS "BOLT FLEX" is part of the RENEGADE SERIES. Developed for the North American market, there are several distinctive design features. It has a hydrodynamic V-shape, weighs approximately 11 lbs., and has two color-coded internal air chambers for easy inflation. The underbody is 1000D PVC so the contact area has improved resistance to underwater hazards. The Bolt Flex benefits from the CLIPLINE, a system of nylon webbing and Velcro strips that runs the length of the model to anchor loose gear or CARGO FLEX side bags. There are two backseat rod holders and an open storage behind the back seat, ideal for assorted fishing extras. The apron has a zippered pocket for direct access to small boxes or tackle. Includes backpack straps and foot pump. Maximum weight capacity 136kg / 250lbs.

 *Renegade Series*

The **ELEMENT**'s size and shape is most similar to the SBD and incorporates responsive design features as defined by the North American waterways. This float tube generally fits all body types and is one of the most popular due to increased seat and weight capacity. V-shaped, weighs approximately 15 lbs., and has two color coded internal air chambers for easy inflation. We've incorporated a PVC bottom to minimize risk of puncture from under water hazards. For improved visibility, there is a security flag holder and bright orange accents. An adjustable foam seat positioned above the waterline for greater comfort. The Clipline consists of nylon webbing and Velcro which runs the length of the float tube. It is designed for versatility and to efficiently anchor loose equipment with lanyards and secure cargo side bags. There are two back seat rod holders, and an open storage space behind the seat, ideal for assorted fishing extras (small cooler, pan net, etc.). Our exclusive pocket apron conveniently allows anglers to keep their lures and tackle essentials close at hand. The shallow pocket with double zip closer fits an assortment of small tackle boxes. Cargo bags sold separately.

- Maximum weight capacity : 136kg/300lbs.

DEF Advance

modèle déposé

Advance Series

Over the past year the option of oars has been of increased interest to anglers. In response to angler demand, Seven Bass Design is happy to introduce our "ADVANCE" option which denotes the addition of oars across a range of said titled models.

DESSUS

DESSOUS

The Seven Bass **DEF Advance** is a hard fabric "V" shaped float tube with foam seats. The Advance model denotes removable oars. The design expertise can be found in its complex material composition. The lower body is made of a thick 1000D PVC fabric to better resist puncture from underwater hazards. A lightweight float tube at 5.8kg/13lbs, the upper portion of the outer shell is made of 600D Cordura to minimize net float tube weight. Anglers position the two vinyl air chambers within the shell and inflate via Boston valves. Tackle can be stored behind the seat or in the generous cargo bags affixed on each side. Several rings allow anglers to attach various accessories. Includes a graduated stripping apron and backpack straps. Available in desert camouflage. Maximum weight capacity: 136kg/300lbs

DESSOUS

DEF ADVANCE

All of the design features of the SBD plus the added benefit of removable oars. This float tube generally fits all body types and is one of the most popular due to increased seat and weight capacity. Equipped with a foam seat, the backrest angle can be adjusted via two side straps. The popular "V-shape" is formed by two independent vinyl air chambers equipped with safety valves. The fact that the air chambers are inflated separately improves safety. Two large attached side bags allow anglers to store lures boxes and loose tackle. Several d-rings for anchoring accessories. Storage area behind the seat is very convenient to place a waterproof bag.

Includes a graduated stripping apron and backpack straps.

- Available in camouflage : desert.

- Maximum weight capacity : 136 kg./300lbs.

Create in 1995 Societe CLEE, a family company based in Bordeaux, has been revolutionizing the fishing and hunting marketplace across France and the EU for over 20 years. **SEVEN BASS Design**, a SOCIETE CLEE brand, is dedicated to developing specialty fishing watercrafts and ancillary fishing accessories. Sebastien Clee has directed product development for the past 12 years. SOCIETE CLEE is consistently a first mover in innovation, design, and technique developments. Below highlights some of our many first to market product launches

- **2011 : ARMADA.** SOCIETE CLEE introduces the first tubeless PVC hybrid float tube in Europe
- **2012 : COBRA.** The first hybrid PVC float tube with oars, for improved mobility, launched in Europe.
- **2014 : JUNGLE OPERATOR.** SEVEN BASS DESIGN reinvents float tubes as we know them by integrating dropstitch technology.

Renegade anglers can now fish seated or standing. As well as use fins, oars, or a trolling motor.

- **2015 : SKULLWAY.** The first fishing float tube with an incorporated trolling motor mount. Go the distance!
- **2016 : BOLT.** SEVEN BASS DESIGN introduces the **Flex system** to anchor gear and customize cargo storage. Float tube can now be personalized for the fishing session at hand.

- **2016 : PLATFORM.** SEVEN BASS DESIGN registered PLATFORM is introduced.
- **2017 : série ADVANCE.** SEVEN BASS DESIGN float tube anglers now have the choice of a classic cordura float tube with oars.
- **2017 : TOMAHAWK.** A cutting edge design to support enhanced multi-angled casting.
- **2018 : JUNGLE OPERATOR FLEX** Wins Efftex's top award "Innovation of the Year". The ultimate float tube is now plug & go

ready.

- **2019 :** SEVEN BAS DESIGN at this year was crowned by 2 Awards at EFTTEX in Brussels:
 - **BEST FLOATING APPAREL**
 - **VISITORS CHOICE**

for the 2019-20 season for its **PLATFORM JUNIOR**.

SEVENBASSDESIGN.COM

Infinity 160

Closer in design structure to a semi-rigid inflatable boat, the **INFINITY 160** "V" shape consist of independent chambers equipped with summit valves inflated individually for maximum safety. Simplified in form and function, Infinity is an ideal model for anglers new to float tube fishing but are looking to start directly with an hybrid. Thanks to the hybrid structure, gone is the hassle or worry involved in installing air chambers as with classic float tube models. Lightweight at 5.5kg/12Lbs this lean float tube has a maximum weight capacity of 325 Lbs. The adjustable foam seat rides high on the water. Includes backpack straps, stripping apron, and two removable side bags.

Hybrid Line

ROCKSTAR 135
The ROCKSTAR 135 is a hybrid PVC float tube with compact proportions when compared to our other models for improved mobility if traversing water or land. Lightweight at 7.6kg/16.5 lbs., this model is composed of two inflatable compartments 35cm/14in in diameter which are designed to support landing more combative fish. A wide adjustable dropstitch seating area has anglers riding high on the water and supports bilateral casting. Store essential tackle in either large removable side bag. The stouter design provides comfort, stability and optimal safety for a maximum weight capacity of 140kg/300lbs.

BRIGAD RACING 160

Introducing SEVEN BASS DESIGN's BRIGAD RACING float tubes featuring clean lines and bold colors. Lightweight at 7kg/15lbs, these models are geared toward pond hopping. Use comfort side/top grips or backpack straps to ease tube transport when hiking into remote waters. These models offer traditional tackle storage in rear seat space or via removable cargo side bags. The lipped stripping apron easily gathers fly line or keeps essential tackle readily available. Our comfortable dropstitch seating has anglers seated above the water line.

 **Renegade Series**

The SEVEN BASS **EXPLORER FLEX** is part of the RENEGADE SERIES.

Hybrids have proven to be the model of choice for avid float tube anglers thanks to quick setup, ease of maintenance, superior material, and extent of customization. Developed for the North American market, this model weighs approximately 8kg /17lbs. V shape consist of independent chambers equipped with high safety valves inflated individually for maximum safety. Designed to accommodate storage needs, Explorer Flex benefits from the CLIPLINE, a system of nylon webbing and Velcro strips that runs the length of the model to anchor loose gear or up to four CARGO FLEX side bags. A high positioned dropstitch seat provides greater comfort and support for extended fishing sessions. There are two backseat rod holders and the unique apron has a zippered pocket for direct access to small boxes or tackle. The Explorer Flex comes equipped with a trolling motor bracket so anglers can quickly and efficiently mount a 40lb e-trolling motor. The backseat storage is ideal for placing a fishing bakkan to hold the motor's battery.

- Available in : two tone grey.
- Includes : backpack straps, carry all bag and foot pump.
- Cargo bags are sold separately.
- Maximum weight capacity : 160kg/ 350lbs.

SB-HLAR-B

In 2012 SBD introduced the **ARMADA 170**, the first chamberless PVC hybrid float tube in Europe. Inspired by their inflatable boat TROOPER, the ARMADA can be defined as a mix of traditional float tube and semi rigid inflatable boat. Hybrids quickly became the preferred model for avid float tube anglers thanks to the quick setup, ease of maintenance, and superior quality. ARMADA has since been updated to include a dropstitch seat for greater comfort and visibility. Essential gear can be organized in removable side bags or in the rear seat storage. Backpack straps are included to assist in transport once inflated.

- Available in four colors : red, green, black, or navy
- Weight : 8.0kg / 17.64lbs.
- Maximum weight capacity : 160kg / 352.74lb

2 sides (left and right) preset for motor mount

Introduced in 2012, the SBD **SKULLWAY 170** revolutionized the float tube market. Anglers could now have the best of both worlds; use fins to pivot on the water while casting and cover more water with motorized assistance. This model has removable underbody fins, side security fenders, and a sturdy trolling motor bracket. Anglers can quickly and efficiently mount a 40lb E-trolling motor. The backseat storage is ideal for placing a fishing bakkan to hold the motor's battery. A middleweight at 10kg/22lbs equipped with detachable side cargo bags and a lipped apron for tackle essentials.

Hybrid Line

With the success of the Armada, SBD launched the **COBRA 170** in 2013. A dynamic V-shaped hybrid with all the benefits of the ARMADA plus removable oars. Design details went beyond the integration of oars to include keels to limit the lateral drift and improved navigation. A booster (inflatable removable floor) extended max load from 160 to 180kg. Tackle can be stored in either the removable cargo side bags and in a fitted rear seat splash-proof bag. Backpack straps are included to assist in transport once inflated.

- Available in four colors : red, green, black, or navy
- Weight : 11.0kg / 24lbs.

The SEVEN BASS "EXPEDITION FLEX" is part of the RENEGADE SERIES.

Developed for the North American market, the Expedition is the largest float tube within the SBD line. The Expedition has all the benefits of a hybrid: quick setup, ease of maintenance, and highly customizable. Weighing approximately 8kg /18lbs, the V shape chambers provide greater buoyancy and are equipped with summit valves for efficient inflation. It comes equipped with a trolling motor bracket, so anglers can quickly and efficiently mount a 40lb e-trolling motor. This model stands apart thanks to its formidable size and weight capacity of 180kg/ 450lbs. The Expedition is ideal for anglers on extended fishing session for larger predator fish. The Expedition Flex benefits from the CLIPLINE, a system of nylon webbing and Velcro strips that runs the length of the model to anchor loose gear or up to four CARGO FLEX side bags. A high positioned dropstitch seat provides greater comfort and support for extended fishing sessions. There are two backseat rod holders and the apron has a zippered pocket for direct access to small tackle boxes. The backseat storage is ideal for placing a fishing bakkan for the trolling motor's battery. Backpack straps are included to assist in transport once inflated.

- Available in : army green

Concept ULTIM-8

The **ULTIM-8 concept** of SEVEN BASS DESIGN comes directly from the user experience and the feedback we have been able to collect all around the globe, whether through all our staff as well as the end users of our products, from the USA to Italy, from Canada to Portugal, from Sweden to Japan, via Germany or the countries of the East, without of course forgetting France !!

It is really the culmination of a user process in all its depth.

The observation is the same everywhere when we talk about fishing for predators in a float tube:

"YES, THE FLOAT TUBE IS VERY IMPORTANT, BUT THE ACCESSORIZATION IS JUST AS IMPORTANT!"

The ULTIM-8 Concept is therefore mainly focused on this: **USER EXPERIENCE**.

All products in the ULTIM-8 range are therefore equipped as follows in order to be accessorized in the simplest way possible by fishermen:

They have **5 Plug & Go bases**:

- 2 Plug & Go Low Profile base placed directly in front of you, on the side of the apron.
 - We have arranged here the LOW PROFILE bases, because if you do not use them, the height of these bases will never hamper you
- 3 classic Plug & Go base with double entry :
 - 2 on each side on the front, and one on the back

Similarly, all models have an **motor mount**, located either on the right rear, or completely at the rear depending on the model

Likewise, they all have the **CLIP LINE system**, and are **delivered directly with**:

- a **FLEX CARGO XL** bag, PVC bag with the largest storage capacity of the entire CARGO FLEX SYSTEM range: 52cm long, 28cm wide and 20cm high generates almost 30 liters!
- a **BAKKAN SYSTEM L**, the largest clip line compatible bakkan, with its 13.2 liters of storage

The ULTIM-8 concept is also available in a **FULL PACK version**.

This version is a perfect complement to the basic version, with the addition of 4 accessories considered essential for any respectable float-tuber:

- **2 Low Profile adapters**, used to connect all plug & Go accessories with the Low Profile bases
- An **R-VOLUTION 3 rod holder** allowing 3 rods to be loaded simultaneously, both spinning and casting, and rotatable 360 ° on a horizontal plane, and 90° on a vertical plane
- An **fishfinder mount** with multi-position and tilting probe support
- A **GO-CAM Mount** to receive cameras, cameras or "action cams" to immortalize your sessions

Here is one of the two float-tubes developed in **collaboration** with **BASS BRIGADE**®, the American brand based in Modesto, California: the **BRIGAD RACING BRGD** edition:
Here we offer a model equipped with a dropstitch seat 15cm thick, exclusive XL cargo bags, as well as a Plug & Go base.

You will find on this models our very last bar fixing system.
The **BRIGAD RACING** in **BRGD**® version is the uncompromising, simple and efficient model. This model benefits from the Delux straps system for easier porting once inflated, even over great distances, as well as its hand pump and a "caryall" type storage bag.
Many **BASS BRIGADE**® logos remind us of belonging to this unique collaboration!

When the pinnacle of what you can find in the global float tube market meets the very best in peach urban textile development, it results in a **collaboration** between **SEVEN BASS DESIGN™** and **BASS BRIGADE®**.

The American brand based in Modesto, California offers you here its version of the FLATFORM JUNIOR in its BRGD edition.

The smallest of the Flatform family, the ultimate evolution of what is done on this type of innovative product, the JUNIOR is here presented in an exclusive color directly resulting from this unprecedented collaboration.

the **FLATFORM JUNIOR BRGD** edition still does not have a rigid structure, and is composed of 3 parts. On the sides are reinforced and coated camouflaged PVC canvas tubes. But this central part is made of 3D Mesh, the SEVEN BASS AIR DROPSTITCH! The dropstitch is a very fine mesh of polyester yarns that keeps the desired shape once the unit is inflated. This mesh structures and stiffens the whole so that your FLATFORM JUNIOR does not look like a big balloon when swollen! This is the so-called "dropstitch" technique.

This production will allow you all the extravagances that you have never even imagined with a float tube !!! Indeed, the space and the stability offered will even allow you to be able to fish standing on your FLATFORM JUNIOR and those despite its 1.70m long and 1.55m wide!

Its manufacture is of the best quality and the equipment is very complete with oars on the side flanges to raise the oars, side bags with their CLIPLINE system. This system will allow you to secure your "flex cargo side bags" or other accessories. Finally, we have modified the motor mount for more security.

The FLATFORM JUNIOR is delivered "Plug & Go Ready": three "Plug & Go" bases are already installed, you just have to equip your boat as you see fit with the depth sounder support, GoCam Mount, rod holder, etc ...

Regarding navigation, it also benefits from the "Bat Wing" between the legs which will break the wave that is created when you sail with the electric motor, we have also added "rocker" on the two points to facilitate navigation and gliding on the boat. water when a little choppy water rises!

On the hull, two small fins are permanently positioned under the side flanges, while a large removable fin is located at the rear, before the engine position.

Stored in its transport bag, it easily finds its place in the trunk of a car. Inflated in a few minutes, it is perfectly rigid thanks to its significant thickness of over 16cm (6") inflated to a maximum pressure of 15 psi for the dropstitch part, and 3 psi on the PVC sides.

SB-DSN-G

SB-DSN-O

Tended for a long time by many anglers who love flash or light sessions, here is the latest addition to the dropstitch family: the **NANO**!

This "little" nugget is refined. No oars or engine support, but the essentials are there ...

The smallest version of the entire Air Dropstitch family, the NANO offers an ultra conventional size.

The latest creation from SEVEN BASS DESIGN, this innovative product still does not have a rigid structure, but is made of 3D Mesh, the SEVEN BASS AIR DROPSTITCH.

The dropstitch is a very fine mesh of polyester yarns that keeps the desired shape once the unit is inflated.

This mesh structures and stiffens the whole so that your NANO does not look like a big balloon once blown! This is the so-called "dropstitch" technique.

This production will allow you all the extravagances that you have never even imagined with a float tube !!!

However, the NANO is not made for standing up fishing, although the bravest will risk it. Its manufacture is of the best quality and the equipment is very complete, thanks to its 3 Plug & Go bases, its CLIPLINE system, and even an integrated height rod!

This system will allow you to secure your "flex cargo side bags" or other accessories. As standard, the NANO comes with a CARGO FLEX XL and a BAKKAN SYSTEM in size L. This NANO is therefore delivered "Plug & Go Ready": three "Plug & Go" bases are already installed, you just have to equip your boat as you see fit with the sounder support, GoCam Mount, rod holder, etc. ...

As for navigation, he also benefits like his big brothers from the "Bat Wing".

On the hull, two small fins are permanently positioned on the sides. A large removable centerboard is located at the rear completes its equipment.

Stored in its transport bag, it very easily finds its place in the trunk of a car.

On the inflation side, it beats all the records that you can know: less than a minute with the original inflator !! it will therefore be terribly effective for sessions where the launch must be done very quickly !!

Once again, without compromising on safety, SEVEN BASS DESIGN has achieved the feat of an innovative and avant-garde product.

Best New Floating Apparel PLATFORM JUNIOR

Société Clee steadies itself for export push after two wins for Seven Bass

Winning three EFTTEX awards in two years is evidence that product development at Société Clee is going in the right direction, says the company's Managing Director, Sébastien Clee. The French manufacturer behind the Seven Bass brand won the Best New Floating Apparel and Visitors' Choice awards for its Platform Junior at this year's show in Brussels, just 12 months after winning the Innovation of the Year award in Amsterdam.

"The awards give legitimacy to a small company like ours because we are in a category with huge, worldwide companies," says Clee. "They mean such a lot at a time when we are just beginning our export strategy and are proof that we are not wrong with our product development."

The Platform Junior is not just another new product, but the missing link between float tube and kayak/SUP fishing, says Clee. At

T: +33 55 789 1313 E: contact@sevenbassdesign.com

Seven Bass Design product milestones

- 2013: ARMADA Europe's first tubeless PVC hybrid float tube.
- 2012: COBRA The first hybrid PVC float tube with oars to be launched in Europe.
- 2014: JUNGLE OPERATOR The float tube is reinvented with dropstitch technology. Anglers can fish seated or standing, using fins, oars or a trolling motor.
- 2015: SKULLWAY The first fishing float tube incorporating a trolling motor mount.
- 2016: BOLT Introduction of the Flex system to anchor gear and customise cargo storage.
- 2016: PLATFORM Enabled anglers to stand up on their float tubes.
- 2017: ADVANCE Series Float tube anglers given the choice of a classic cordura float tube with oars.
- 2017: TOMAHAWK A cutting-edge design to enhance multi-angled casting.
- 2018: JUNGLE OPERATOR FLEX Plug-and-go float tube wins EFTTEX Innovation of the Year Award.
- 2019: PLATFORM JUNIOR Wins two EFTTEX awards, Best Floating Apparel and Visitors' Choice.

1.70 metres, it is the perfect size for a conventional float tube, has the stability of an SUP, weighs less than 13kg and is easy to store when deflated.

"We have introduced a number of 'firsts' to the market," adds Clee. "This includes allowing anglers to stand up on their float tube, a real revolution. But that came at a cost for hardcore belly-boat fishermen because it was longer than they were used to. However, the Platform Junior has reconnected with the float tube purist."

"It is smaller and lighter, can be used seated or standing, and with fins, oars or trolling motor. It is a real fisherman's toy but also a useful tool."

www.sevenbassdesign.com

This is the PLATFORM JUNIOR.

The smallest version of the Flatform family, the JUNIOR offers the same size as most conventional float tubes. Ultimate evolution of what is done on this type of innovative products, the PLATFORM JUNIOR has no rigid structure. The PLATFORM JUNIOR, like its big brothers, is composed of 3 parts. On the sides are rolls made of PVC reinforced and coated. But this central part is made in 3D Mesh, the SEVEN BASS AIR DROPSTITCH! The dropstitch is a very fine mesh polyester son to keep the desired shape once the unit inflated. This mesh structure and stiffens all so that your PLATFORM JUNIOR does not look like a big balloon once gong! This is the so-called "dropstitch" technique. This production will allow you all the extravagances that you have never imagined with a float tube !!! Indeed, the space and stability offered will even allow you to fish standing on your PLATFORM JUNIOR and those despite its 1.70m long and 1.55m wide!

Its manufacture is of the best quality that it is and the equipment is very complete with oars on the lateral tubes to raise the ladies of swimming, side bags with their system CLIPLINE. This system will allow you to secure your "flex cargo side bags" or other accessories. Finally, we modified the engine support for more security.

The PLATFORM JUNIOR is delivered "Plug & Go Ready": three "Plug & Go" bases are already installed, you just have to equip your boat as you wish with the sonar stand, GoCam Mount, cane holder, etc ...

Question navigation it also benefits from the "Bat Wing" between the legs that will come to break the wave that is created when we navigate the electric motor, we also added "rocker" on both points for easy navigation and sliding on the water when a little chop rises!

On the hull, two small fins are permanently positioned under the side flanges, while a large removable fin is located at the rear, before the engine position.

Stowed in his carrying bag, it easily fits into the trunk of a car. Inflated in minutes, it is perfectly rigid thanks to its significant thickness of more than 16cm (6 ") inflated to a maximum pressure of 15 psi for the dropstitch part, and 3 psi on the PVC sides.

The PLATFORM JUNIOR is the pinnacle of what you will find on the world float tube market and that's why it won 2 awards at the international fair of EFTTEX 2019 in Brussels:

- BEST FLOATING APPAREL season 2019-2020
- VISITOR'S CHOICE season 2019-2020

Platform Evo

modèle déposé

side bags
Cargo Flex
page 38

An inflatable watercraft, in class all its own, SBD's patented **PLATFORM EVO** is a true crossbreed between a SUP and a hybrid float tube. Ideal for fly or cast line fishing, this sturdy model is approximately 42 lbs. It is engineered using the latest in dropstitch construction. The central platform is ridged when inflated and is supported by two curved side rockers to provide hydrodynamic support. On the hull, two small fins are permanently positioned under the side rockers, while a large removable fin is located at the rear. Oars and cargo side bags are removable to adapt to the fishing session at hand.

Platform Evo's benefits come to life on the water. Anglers now have the choice to cast seated all the while using their fins to guide the craft as with a traditional float tube or cast standing thanks to the rigid central fishing platform. Experience improved movability by simply lifting swim fins from the water and using oars to propel the craft across the water. For longer distances easily secure an e-trolling motor to provided bracket.

After the fishing session, use the dual action pump to deflate the craft. The Platform Evo can then be folded, secured with strap and placed in its carry all bag.

Dropstitch line Flatform **Evo XL** modèle déposé

Whether fly or cast line fishing, the **FLATFORM Evo XL** is designed to meet the demands of anglers fishing larger open bodies of water such as the Baltic Sea, or anglers fishing remote waters inaccessible to boat and subject to cooler water temperatures. The FLATFORM Evo XL builds off of the unparalleled success of the FLATFORM Evo as a dynamic fishing vessel that delivers on form and function. A crossbreed between a SUP and a hybrid float tube the Flatform Evo XL is a portable fishing platform with impressive navigational ability that does not require a trailer or roof rack to transport.

The Flatform Evo XL weighs approximately 21kg/46lbs and is engineered using the latest in dropstitch construction. The PVC structure means that any accessory that can be glued on to an inflatable kayak or SUP can also be glued onto the FLATFORM Evo.

For enhanced navigation, anglers use fins to navigate slowly or pivot while casting. For greater mobility, anglers lift their feet from the water, rest their fins on the spreader bar and use oars to glide across the water. While for longer sessions or on larger bodies of water a e-trolling motor can be easily mounted.

Flatform Evo XL offers large proportions and a wider central fishing platform, 8ft long and 5.5ft wide. Oars and cargo side bags are removable to adapt to the fishing session at hand.

Angling news in the tackle trade www.angling-international.com

EFFTEX WINNERS

Innovation of the Year CLEE FISHING JUNGLE OPERATOR FLEX

Société Clee: we have so many opportunities in Europe now

The winner of the coveted Innovation of the Year award, EFFTEX believes that the product is a 'winner's box' of new opportunities. Clee added that his company's appearance at EFFTEX exceeded all expectations. "Our booth was buzzing all the time and we had visitors from all over Europe, including Russia, Eastern Europe, Scandinavia, Belgium and Germany."

"We really worked for us - and winning was a great achievement. We are only looking for the right sort of partners."

Above: all smiles for the Clee team and its innovative float tube.

side bags
Cargo Flex
page 38

You will inevitably appreciate its evolution, here is the JUNGLE OPERATOR FLEX !!

Presented at Efftex Amsterdam in 2018, SEVENBASS DESIGN does not come back from this international trade fair empty handed! Indeed, we are very happy to come back from EFFTEX with an Award!

And not just any one, but the coveted one, and covering all categories, namely the "Innovation of the Year Award season 2018-2019"
(to also specify that we are the only French company to have had an award this year and re COCORICO !!)

Fruit of the work of the whole team, and the crossing of the experience of ambassadors in the field, this float tube has been designed from A to Z for the sinner!

Still like the PLATFORM and the JUNGLLE OPERATOR, the JUNGLE OPERATOR FLEX can be used with fins, oars and / or electric motors, and both seated and standing!

But in addition it has been completely revised to allow you to have your JUNGLE OPERATOR ready to go: it is "Plug & Go Ready" !!

Four "Plug & Go" glue bases are already positioned, you just have to equip your boat as you see fit with the depth sounder support, GoCam Mount, rod holder, etc ...

As for navigation, everything has also been revised, we have introduced a "bat wing" between the legs which will break the wave that is created when you sail with the electric motor, we have also added "rocker" on the two points to facilitate the sailing and gliding on the water when a little choppy water rises! We have also equipped it with our "clip line" which will allow you to secure your "flex cargo side bags" or other accessories, we have modified the engine support for more safety and the seat, which is now an inflatable seat in "Dropstitch" too, for your comfort on board your JUNGLE FLEX! This last element will be very useful to you on your winter sessions, with choppy water to be sure to be 100% dry !!

You can find this JUNGLE OPERATOR FLEX in 2 versions:

- **Plug & Go Ready** : delivered with its motor support, its pair of oars, the Dropstitch inflatable seat with 3 dorsal rod supports, its foot bar, its transport bag, and 4 Plug & Go bases already positioned.
reference: **SB-JOF-O**

- **FULL Plug & GO** : this is the Plug & Go ready version, with in addition 3 rod holders, a GoCam Mount, a quadruple "AMIRALE" base, and an echo sounder support!
reference: **SB-JOFK-O**

Jungle Operator *Evo*

modèle déposé

L'original !

side bags
Cargo Flex
page 38

In 2015, Seven Bass Design launched the **JUNGLE OPERATOR** signaling the next generation of float tube design. 2019, is now time to the **JUNGLE OPERATOR EVO**.

Using the latest in performance materials, the Jungle Operator evolved the fishing float tube to a dynamic inflatable fishing vessel that delivers on form and function. The air dropstitch structure creates a ridge platform, so anglers can cast seated or standing.

A formidable float tube weighing 24kg/ 42lbs, the drop stitch material means the structure is ridged while inflated. For enhanced navigation, anglers use fins to navigate slowly or pivot while casting. For greater mobility, anglers lift their feet from the water, rest their fins on the spreader bar and use oars to glide across the water. While for longer sessions or on larger bodies of water a e-trolling motor can be easily mounted. When deflated with the reversible pump the craft can be folded and stored in a carryall that fits in most car trunks.

S B -

The PVC structure means that any accessory that can be glued on to an inflatable kayak or SUP can also be glued onto the Jungle Operator.

The Jungle Operator is a portable fishing platform with impressive navigational ability that does not require a trailer or roof rack to transport. Side storage bags are included for essential fishing tackle.

Cargo Flex System

CARGO FLEX SYSTEM

Thanks to the CLIPLINE installed on the majority of the SEVEN BASS DESIGN float tubes, a real life line composed of a "daisy chain" and 2 velcro strips, now you can choose your CARGO FLEX side bags

The CARGO FLEX make up a whole range, with several models of sizes, shapes, and different materials, corresponding necessarily to a particular use and need.

With SEVEN BASS DESIGN, you can now prepare the bags of your float tubes in advance, as well as choose their locations on your float tube, in order to best match your type of fishing.

BASS BRIGADE

Accessoires

Rod Holder **SQUAD 1**

The SQUAD 1 is an upright single rod mount with a rotating head. Designed to securely mount a single spinning or fly rod to any classic or hybrid float tube models. The adjustable strap configurations enable the mount to be positioned on either the left or right side of the craft.

Réf : SB-RH1

Support Sondeur **SQUAD FF**

Le **SQUAD FF** est le support sondeur pour float tube de la gamme SEVEN BASS le plus simple. Ce support de sondeur est accompagné du support de sonde indispensable au bon positionnement dessous votre float tube. Il se positionne indifféremment à droite ou à gauche, sa tête rotative accueillera à merveille tous vos sondeurs de tailles petite à moyennes.

Réf : SB-RHFF

Rod Holder **SQUAD 4 BAKKAN**

Le **SQUAD 4 BAKKAN** est LE support de cannes pour float tube de la gamme SEVEN BASS qui permettra de pouvoir partir en pêche avec 4 cannes, et cette fois ci en l'associant à une bakkan, il va maintenant pouvoir recevoir plus que simplement quelques leures ou du petit matériel, grâce à sa capacité de stockage de presque 23 litres.

La structure du SQUAD4 BAKKAN est fabriquée en aluminium tandis que tout le fond est en PVC soudé complètement étanche.

Dimension interne : 35 x 41 x 16cm

Réf : SB-RHB4

Rod Holder **SQUAD 4**

To support fishing sessions where more than one rod is desired, the SQUAD4 is a horizontal multi-rod mount made of aluminum, PVC and reinforced canvas. The foam brace securely cradles up to 4 rods. The self-draining undertray, designed to rest lures or small tackle, expands the prep space and keeps essential materials within reach.

Réf : SB-RH4

Rod Holder **SQUAD 6**

For extended float tube fishing session, the SQUAD6 is a horizontal multi-rod mount made of aluminum, PVC and reinforced canvas. The foam brace securely cradles up to 6 rods. The self-draining undertray, designed to rest lures or small tackle, expands the prep space and keeps essential materials within reach. Ideal for tournaments where anglers need access to their range of rods.

Réf : SB-RH6

BAKKAN Line

SEVEN BASS DESIGN fishing bakkans are water resistant and lightweight for multi-functional appeal. Ideal for storing anything from loose tackle to live bait.

BAKKAN - RH LINE

The HARD **RH** LINE series of Bakkans SEVEN BASS is composed of 2 rigid waterproof bags welded, waterproof splash water and spray. Their zipped lids are perfect for preventing spray and other rain from entering. They each have on each side a molded integrated rod holder, with a locking system of your rod. Both models are equipped with reinforced self-locking carrying handles.

Ref.	Color	Volume	Dimensions
SB-BKH-36P	Red & White	22.5l.	36 x 25 x 25cm.
SB-BKH-40P		27l.	40 x 27 x 25cm.

BAKKAN - HARD LINE

The HARD LINE series of SEVEN BASS Bakkans consists of two rigid waterproof bags, medium sizes (22.5 and 27 liters) ideal to store tackle and lure boxes. Zipped lid designed to help keep the content dry. Both models have a handy outside pocket that can receive either a small box or an aerator if you need to turn your bag into temporary livewell. They are also equipped with self-locking reinforced handles and an adjustable shoulder strap.

Ref.	Volume	Dimensions
SB-BKH-36	22.5l.	36 x 25 x 25cm.
SB-BKH-40	27l.	40 x 27 x 25cm.

BAKKAN - SOFT LINE

The SOFT LINE series of Bakkans SEVEN BASS is composed of four semi-rigid waterproof bags welded, waterproof splash water and spray.

Respectively their capacities are 20, 25, 45 and 85litres.

You will find in this range the perfect bakkkan for storing your boxes of lures and accessories. All their lids are zipped. On occasion you can wish to turn them into temporary tanks.

The three largest models are equipped with self-locking reinforced carry handles, and the four models have an adjustable shoulder strap. Because of their flexible structure, they are not bulky when flattened for storage and storage.

BAKKAN - P.M.L. LINE

The P.M.L. LINE Bakkans are a semi-rigid welded container characterized by its flexible structure. These multi-purpose containers are ideal for storing small tackle and lures. The welded design keeps contents dry to splash or spray. Zip closure and transparent lid allows angler to quickly asses contents.

	Ref.	Volume	Dimensions
Bakkan P	SB-BKS-PO	2.2l.	19.5 x 12.5 x 9cm.
Bakkan M	SB-BKS-MO	4.2l.	24.5 x 19.5 x 9cm.

LEGACY 150N

The Seven Bass LEGACY150N is an automatic inflation vest tested and certified according to the international CE and ISO 12402-3 standards. Valid for all types of off-shore nautical and aquatic activities.

Features:

- Conform to standards
 - ISO 12402-3
 - CE 150N
 - Inflatable lifejacket 150 Newton
 - SOLAS approved retro-reflective tapes
 - Ergonomic cut at the shoulders for optimal freedom of movement
 - Comfortable, lightweight and robust
 - Automatic inflation in less than 5 seconds, with possibility of manual inflation for a double security.
 - Equipped with CO2 cartridge 33gr, flotation 150 Newtons.
 - Suitable for users over 60 kg and for temperatures between -30 ° C and + 65 ° C.
 - Neoprene protection at the neck for greater comfort.
 - Fixing ring at the back of the collar.
 - Integrated holding harness.
- One size: 94 to 140cm bust
- weight: <1.2kg

Anchor : Complete set

Galvanized mini grapple anchor with special tilted shovel to support static float tube fishing on your best spots!

This complete set includes:

- an anchor of 700gr,
- a rope bag
- 9m of rope
- a buoy strung on the rope
- a stainless carabiner

Réf : SB-ANC

Anchor DRIFT

The DRIFT is a reinforced nylon anchor, conical in shape, for float tube anglers looking to leverage drift fishing conditions. Once in water the anchor positions itself correctly thanks strategic placement of ballast and floating foam. The DRIFT is an essential accessory to slow down your craft in order to better explore your positions.
Dimensions: 12 x 85 x 65 cm.

Réf : SB-AKF

Floating Net FLYTA

FLYTA is the 8mm mesh floating net of the VØLKIËN Soul range. The upper surface can be closed by a quick clamping link. The bottom is equipped with a ballast to fix a ballast and to avoid that the net folds on itself. When simplicity is practical ultra, you have FLYTA.
An accessory you will not be able to do without during your float-tube sessions
Inside diameter of 45cm for a depth of 65cm

KIT SUPPORT MOTEUR AVANT pour unité gonflable

Here is a complete set for front engine mounting with 4 pads to stick on any inflatable PVC unit, inflatable boats as well as hybrid float tubes. So you can customize or simply improve your craft, by adding this support which will welcome an electric motor or any other accessory that you will need to fix, clip or tie on a rigid base. Support comes with 4 pads and glue. ref : **SB-KSMA**

Colle EXTASY GLUE

EXTASY GLUE Special glue for gluing PVC products.

Working temperature
18 ° C to 30 ° C

The adhesive and the materials to be bonded must not be used at a temperature below + 18 ° C. An adhesive exposed to low temperatures must be well mixed and tempered at a temperature of 18 - 30 ° C minimum 72 hours before use.

Surface preparation

Surfaces to be bonded must be clean, dry, free of dust and any grease.

gluing

Apply a thin film of fine and regular glue on the two materials to be assembled. After the aeration time of 2 to 5 minutes display both materials. The open time as well as the aeration time is a function of the ambient temperature, the thickness of the layer applied and the absorbency of the supports. As soon as the solvents are evaporated, the glue film becomes dull and the two supports can then be reactivated at a temperature of approximately + 70 ° C and displayed directly by exerting a good contact pressure.

In some cases, it is possible to accelerate the drying by a heating tunnel which allows to reactivate in stride.

référence : **SB-EXTGL**

kit de réparation EXTASY Liquid PVC

EXTASY Liquid PVC for the repair of all products made of PVC.

Now you do not need to look for a patch of similar material to glue a boat, float tube, standup paddle or damaged raft. Just put a few drops of EXTASY Liquid PVC on the perforation or cut. EXTASY Liquid PVC will follow you everywhere, whether in the mountains, at sea, in the river!

MANUAL:

The surface to be repaired must be dry and clean.

EXTASY LIQUID PVC should be used for all punctures of a product, or a cut of 2-3 cm maximum.

Just drop one or more drops of EXTASY LIQUID PVC at the location of the puncture or cut (picture 1).

For best results, apply an additional coat of EXTASY LIQUID PVC again after a few minutes (picture 2).

If the damage is too great and it is about a cut / notch of more than 2-3 cm, then it is necessary to use a reinforcing frame during the apposition of the first layer. The second layer must be passed within 5-10 minutes (picture 3).

It is obvious that these repairs concerning products whose use is subjected to a vital risk, (boats in PVC, float tube, pontoon, raft, etc.) the degreasing of the surface to be repaired is MANDATORY!
Post repair use should not be done before 24 hours.
Not suitable for repairing rubber goods!

Plug&Go - SRS (SIDE RACK SYSTEM)

1 Choose the length you need

You will first have to choose the rail length, depending on your needs and the use you will make of it, to create your Side Rack System (SRS). It comes in 60cm and 1 meter.

The rails are to be fixed directly on the gunwales of your boats. You will need to get the matching screws and the best suited to your needs, depending on whether you attach to wood, fiber or aluminum. In the vertical position, openings are located on one side of the rail, and to position downwards to evacuate all the water that would otherwise be stagnant.

Réf 60cm : **SB-KP202-60**
Réf 100cm : **SB-KP202-100**

2 Choose the orientation of your use

option VERTICAL

In vertical use, you can easily fix your rail to an inner edge of your boat. You will need to use the VERTICAL rail base. You can position as many VERTICAL bases as you need, and your rail length can accommodate!

Réf : **SB-MT420**

option HORIZONTAL

In horizontal use, you can fix your rail flat on the top of the gunwale of your boat.

You will have to choose between the horizontal bases HIGH or LOW. So you can position as many bases as you need, and that your rail length can accommodate!

HIGH

LOW

Réf : **SB-LMT601A** Réf : **SB-LMT601**

3 With all the rest of the PLUG & GO range of accessories, let your dreams run wild and your needs, by attaching cane doors, echo sounder door, camera stand, etc...

In order to benefit from the **SRS**, but without having a permanent solution, we offer you 2 other temporary options adapting to particular cases

PLUG&GO - complet Kit SRS for bench

The PLUG & GO SRS complete kit for bench allows you to temporarily fix a 30cm mini rail on a boat or inflatable boat bench, thanks to a second plate, thus simply taking the bench in sandwich.

It comes with 2 LOW horizontal bases that can accommodate the entire PLUG & GO range.

For bench width 22.5cm max

Réf : **SB-BP425**

PLUG&GO - complet Kit SRS - SIDE

The complete PLUG & GO SRS - SIDE kit allows to temporarily fix, horizontally or vertically, a 30cm mini rail on a gunwale, a boat bench or anything! Thanks to its vice system, it can be fixed on any support less than 6.5cm thick.

You can then choose to set the bases according to their uses (HORIZONTAL, HIGH or LOW), then to accommodate the entire range PLUG & GO.

Réf : **SB-BP427**

Fish Finder Mount PLUG&GO *Large*

This PLUG & GO fish finder mount includes a platform with multibrand pre holes.

Réf : SB-KP106

Fish Finder Mount PLUG&GO *Long*

This PLUG & GO echosounder support includes a tilting platform with multi-branding. This support fits on all PLUG & GO support bases and extensions

Réf : SB-KP106H

Rod holder PLUG&GO

Universal PLUG & GO rod holder. Suitable for all our bases, this version comes with a safety clasp, making it usable for both casting and spinning rods.

Réf : SB-RH303

Rod holder PLUG&GO - LOCK

The PLUG & GO LOCK rod holder fits on all our bases. This short version comes with a rigid safety clasp, making it usable for both Casting and Spinning rods.

Réf : SB-RH302

KIT Rod holder PLUG&GO *R-VOLUTION 3*

Rod holder PLUG&GO - *GENIUS*

PLUG & GO GENIUS rod holder adaptable to all our bases. This version comes with a safety clasp, making it usable for both Casting and Spinning rods, as well as a quick release trigger

Réf : SB-RH801

Rod holder PLUG&GO *R-VOLUTION 3*

The rod holder PLUG & GO R-VOLUTION 3 fits on all our bases. The KIT version comes with a base to be glued, allowing to use it on all our float tubes of the range HYBRIDE and DROPSTITCH. The R-VOLUTION3 can accommodate 3 rods simultaneously, both spinning and casting. It can be rotated 360 ° on a horizontal plane, and 90 ° on a vertical plane, which will allow you to adapt to a Platform or a Rockstar for example !!
